Work With The First Choice In Data Collection Software

Carlson SurvCE's powerful features help you do more, do it accurately & in less time:

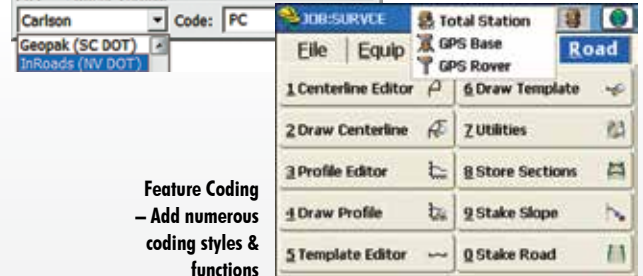

- **Powerful Roading:** favored by U.S. DOTs and heavy highway contractors around the world
- **Advanced functionality** for staking intersections and cul-de-sacs using Carlson Road Network Files
- **Highly graphical and intuitive** user interface – the software prompts you so no detail is missed
- **Strong GIS features** for accurate data capture, including attribute data, that allows seamless links to Esri®
- **True versatility:** SurvCE runs on most GPS and total station equipment in service today
- **Optimal Field-to-Finish:** no need to spend extra hours in the office to make drawings
- **Easy data exchange** due to rich support of CAD file formats and .dwg, .dgn, .shp
- **More field capabilities** with quick and easy volume calculation and ability to generate points from polylines
- **Cut/Fill stakeout** using surface files

Top New Features in Carlson SurvCE:

1. Option to import text in drawings in addition to blocks;
2. Ability to process GPS base records from the raw file into the CRD file;
3. New 2D sketch polyline and snap option;
4. Advanced point averaging and blunder detection in the field (with accuracies in-between RTK and post-processing);
5. Ability to freehand sketch in the map screen;
6. Allows GIS storing in any stakeout routine;
7. Support for full output reporting in GNSS analysis;
8. Enhanced ability to stake roads by complete LandXML Road Model—load and go;
9. Cogo-Point Protection that allows a point range and makes a .txt file for station, offset, and elevation and other user-defined fields from the reference;
10. Full compatibility with Stewart Weir Software;
11. Enhanced performance on new capacitive screen data collectors.

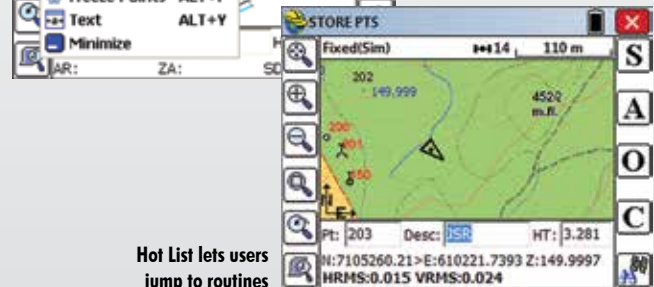

Tab-Based MENU Structure – All commands are visible in each menu

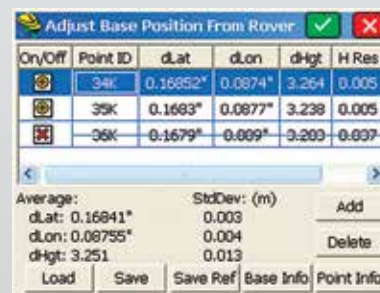

Feature Coding – Add numerous coding styles & functions

Load Esri Maps, Input-Edit GIS Attributes, in SurvCE

Hot List lets users jump to routines

Base Corrections from Rover feature

Both Carlson SurvCE and SurvPC are complete data collection systems for Real Time (RTK) GPS and Total Stations with in-field coordinate geometry.

Both support the widest range of popular and new release RTK GPS and conventional / robotic total stations.

All The Functionality Of SurvCE On A Full Windows® PC

Carlson SurvPC delivers the world's most flexible & powerful data collection software on the PC platform. This means:

- Increased hardware capability
- Increased virtual memory = increased ability to work with large sets of data
- Increased screen size & more convenient touch screen usage

SurvPC advantages include:

- Bigger screen display
- Bigger buttons (on touchscreen computers)
- More graphic power
- More processing power
- Full Windows PC compatibility
- File formats same as Carlson Office software (.fld vs. .fcl files for field-to-finish)
- Compatible symbol libraries
- Ability to import Microstation DGN files
- Import and export AutoCAD .dwg files
- Aerial photo overlays
- Output to Excel

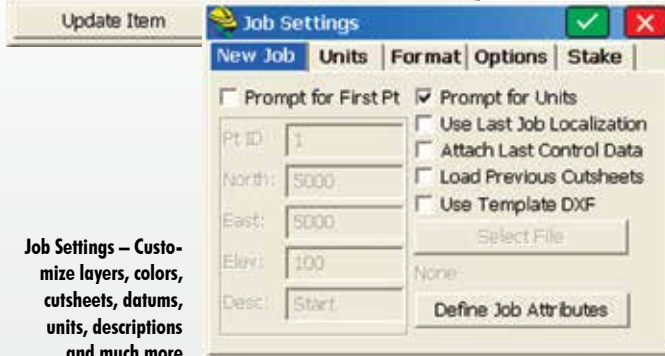

Carlson SurvPC is FIRST Cross-Platform Field Solution

Get the ability to work natively in Esri® and DGN® with no conversion & take your maps to the field no matter what the source

- Intuitively use Esri Maps to perform all survey functions with no downtime learning new software
 - If ArcMap10, ArcView or equivalent reside on the same PC, SurvPC 'finds' the Esri engine and reads and writes Esri MXD files automatically, or
 - SurvPC can be purchased with the Esri OEM engine built inside
- Stake out, identify or draw to any existing feature by conventional 'snap' selection in Esri, DGN or .dxf
- Create new points in Esri, DGN or .dxf with symbols and formats native to the map
- Use SurvPC to recognize DGN drawing 'levels' and cell structure of entities; new points created are stored graphically in the pre-defined cell format and new linework also writes directly to the DGN file

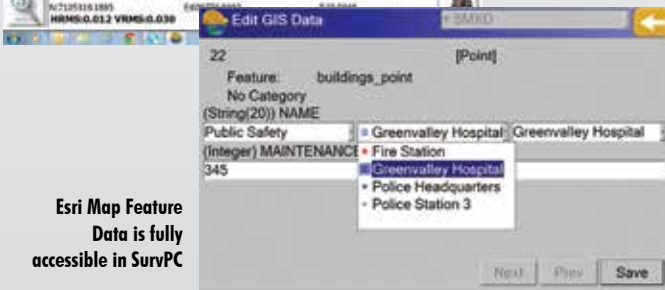

Advanced point ID controls

Job Settings – Customize layers, colors, cutsheets, datums, units, descriptions and much more

SurvPC functioning in an Esri Map Document

Esri Map Feature Data is fully accessible in SurvPC

Load DGN files directly - "snap" to lines and points to stakeout DOT projects

SurvPC reads Microstation® cell structures and stores/draws new points in native formats

Carlson Field Solutions

For SurvCE:

Carlson offers hardware options for use with SurvCE data collection software — either the Carlson MINI2, Carlson Surveyor2 or Carlson Topomate, all fast, powerful and incredibly durable devices.

For SurvPC:

While Carlson SurvPC may be purchased for ANY standard Windows PC computer, Carlson recommends utilizing the software with the Carlson Supervisor handheld PC as an ideal combination.

SurvCE/SurvPC Languages:

In addition to English, Carlson SurvCE and Carlson SurvPC are available in 20 additional languages, including:

- Chinese ■ Croatian ■ Czech ■ Dutch ■ Finnish ■ French ■ German
- Greek ■ Hungarian ■ Italian ■ Korean ■ Polish ■ Portuguese ■ Romanian
- Russian ■ Serbian ■ Spanish ■ Swedish ■ Tagalog ■ Turkish

SurvPC Minimum Requirements:

- Windows OS: Windows 2000, Windows XP, Windows Vista, 32-bit and 64-bit, Windows 7, 32-bit and 64-bit
- Processor speed: any Pentium compatible, Atom supported
- RAM, 256MB RAM required (1GB recommended)
- 1GB hard-drive space required

Carlson Software

Carlson Software develops software solutions that bring the land development professional from concept to completion – the full cycle of a project.

An independent company founded in 1983, Carlson Software is well known for its comprehensive civil engineering, land surveying, machine control and positioning, and mining software solutions. Its dedication to customer service is renowned in the industry.

Both Carlson SurvCE and Carlson SurvPC work on virtually all RTK-GPS and Total Stations including the Carlson SuperG (Supervisor+ GNSS) and the Carlson Surveyor+ GPS, plus: Topcon, Leica, Altus, CHC, Navcom, Javad, Satlab, Hi-Target, South, Hemisphere, Datagrid, Champion, Geomax, Foif, Horizon, Kolida, North, Novatel, Pentax, Sokkia, Spectra Precision, South, Stonex, Unistrong and some Trimble® models (not available on the R6 and R8 where access is blocked).
